

LATE RAMESH WARPUDKAR ACS COLLEGE, SONPETH DIST.PARBHANI

PROGRAMME OUTCOMES AND COURSE OUTCOMES

The college has clearly stated following learning outcomes stated in vision and mission statement and objectives of the college.

Vision: Reaching to the Unreached

Mission: To offer opportunities of the empowerment to the rural learners by imparting quality higher education within the capacities.

Objectives:

- To strive for imparting higher education to rural masses in general and girls in particular.
- To seek socio-cultural transformation of rural youths.
- To inculcate the values like national integration, patriotism, liberty, equality, fraternity, humanity and tolerance among youths.
- To nurture the quality of social and civil responsibilities among the students.
- To create youths capable to be employed.

The students and staff are made aware of these through the prospectus and meetings. Various curricular, co-curricular, cultural and extension activities are organized to these effects. Fresher's are aware about these objectives in the induction programme. The discipline wise program outcomes are as following:

Program Outcomes: B A. (Bachelor of Arts)

Our college is affiliated to Swami Ramanand Teerth Marathwada University, Nanded. This college offers B A in English, Marathi, Hindi, History, Political Science, Public Administration and Economics. The university designed the program outcomes in its curriculum.

5. Students of the course will be able to state the use of various deduction to reduce the taxable income.
6. Student will be capable of choosing a career to become a Tax consultant.

Skill Enhancement Course -I

Paper No. SEC.1.1 Management Skills

Outcomes: After acquired the skills of management students be capable

- 1 Improve the technical skill and ability
- 2 students can develop his analytical ability & competent use of tool, work resolved the solve the problems
- 3 It help to coordinate and resolved the conflict within organizations
- 4 It can develop the team work
- 5 It help to develop integrity, self-awareness dedication, external conduct amongst the people

Paper No. SEC.1.2 Banking Service Skills

Course Outcomes

- 1 It is helpful to acquaint the knowledge of banking procedure
- 2 It is helpful to understand the detail knowledge of banking and financial situations
- 3 It is helpful to enable Banking, Economics, and management experience

Skill Enhancement Course -I

Paper No. SEC.1.3 Basic Accounting skills

Course Outcomes:

The students will be able to handle basic accounting practices skillfully.

B. Com. Third Year Semester V (CBCS Pattern)

BC.5.1 Advanced Accounting – I

Course Outcomes

Student can acquire knowledge of advance level of accounting for professional

BC.5.2 Management Accounting – I

Course Outcomes:

Students can take managerial decisions regarding finance of the business.

BC.5.3 Auditing-I

Course Outcomes

Regarding minute study to find out the fraud and errors in accounting

BC.5.4A- Income Tax Law & Practices

Course Outcomes:

To get oneself acquaint with the direct taxes and individual income.

BC.5.4B- Human Resource Management

Course Outcomes:

Regarding the major living aspect of business i.e. human resources, helps to know the recruitment and other basic needs.

B.Sc. (Bachelor of Science)

Program Outcomes: B. Sc (Bachelor of Science)

Our college is affiliated to Swami Ramanand Teerth Marathwada University, Nanded. We offer Chemistry, Botany and Zoology under this discipline. The college has applied to state government to rejuvenate the subjects like physics, mathematics and microbiology. The university has not designed the program outcomes in its curriculum. However, the college has designed, based on the subjects offered, the following program outcomes of the B SC program.

1. The program will develop the scientific temperate among the students.
2. It will develop interest for science among the students.
3. The students will be able to understand the basic concepts of the subject offered.
4. The students will be sensitive to the environmental issues.
5. New avenues of research and employment will be open to the students.
6. Students can do Post Graduate Studies in their respective subjects studied in 'Under Graduate' level.
7. The B.Sc. graduate students can pursue B.Ed. course and opt teaching career in the schools.

Major Chemistry NEP 2020 (With effect from 2024-25)
B. Sc. First Year
(Semester-I)

Program Outcomes:

The students graduating with degree having chemistry as a major or Minor should be able to acquire/have:

1. Core competency in subject chemistry and in allied subject areas.
2. Students are expected to have coherent understanding of fundamental principles, current trends as well as future opportunities in subject area.
3. Knowledge of basic principles in instrumental techniques used laboratory.
4. Capability to characterize, identify and separate components of unknown compounds using modern instrumental methods.
5. Competency in critical thinking after identifying assumption that frames our thinking and action, checking out their degree of accuracy, validity and finally our response from different Perspective.
6. Skill to apply role of chemistry in safe handling of chemicals, environmental issues and other societal concerns.
7. Awareness of different value systems including our own, understand moral dimensions of our decision and accept responsibility for them.
8. The ability to engage in lifelong learning in broadest context of socio-technological change
9. Ability to elicit views of others, mediate disagreements and come up with healthy conclusion in group discussion.

UG Chemistry (Semester-I)
Paper- (SCHECT 1101):
Organic Chemistry & Inorganic Chemistry

Course Outcomes:

1. The basic things for chemical reactions i.e. Substrate and Reagents Types of reagents Electrophilic and Nucleophilic Homolytic and heterolytic fission. Electronic displacement effect.
2. Aromatic, antiaromatic and nonaromatic for organic compounds.
3. The different intermediates in chemical reactions and their uses in synthesis
4. Appreciate the concept of grouping elements in accordance to their properties led to the development of Periodic Table.
5. compare the reactivity of elements and correlate it with their occurrence in nature;
6. Understand the ideas related to periodic properties of elements such as atomic radii, ionization enthalpy, electron gain enthalpy, electronegativity.

Organic Chemistry & Inorganic Chemistry (Practical)

Course Outcomes:

After successfully performing practicals, students will be able to:

1. Identify type of titration and estimation of ions.
2. Prepare required standard solution.
3. Determine hardness of any water sample.
4. Handle protocol for the synthesis of organic compound.

5. Select suitable purification method for synthesized organic compound.
6. Determine physical constant of solid/liquid.

Generic Elective (GE) Paper First (SCHEGE 1101)

Course Outcomes:

After studying this students will be able

- to understand the chemistry behind the product which we use in our day to day life.
- enlightened about the pros and cons of using processed food.
- to create curiosity among the readers about chemicals.

UG Year I: Semester I (SCHES1101)

Skill Enhancement Course

Fundamentals of Chemistry Laboratory

Course Outcomes:

1. Safety and Laboratory Management: Students will understand and implement essential safety protocols and procedures for working in a chemistry laboratory, including proper lab design, storage, ventilation, and safety provisions, ensuring a safe and efficient working environment.
2. Familiarity with Laboratory Apparatus: Students will identify, handle, and maintain various laboratory apparatus, including glassware, volumetric tools, and miscellaneous equipment, gaining proficiency in their proper use and storage.
3. Solution Preparation Skills: Students will accurately prepare chemical solutions, understanding the concepts of solubility, concentration measurements (percentage, molarity, normality, molality), and the calculation of masses and volumes for preparing solutions, essential for conducting precise and reliable experiments.

OR

UG I st Year Semester I (SCHES1101)

Skill Enhancement Course

Water Pollution

SKILLS/ COMPETENCIES / LEARNING OUTCOMES

Upon completion of this course, students should be able to:

1. List the main water pollutants and their effects on human health and the environment.
2. Discuss several types of water pollution problems and their chemical aspects affecting them.
3. Interpret the results of laboratory analysis for water characterization.
4. Develop a broad overview understanding of the strategies, regulations and policies to manage water pollution.
5. Describe unit operations used for wastewater treatment.
6. Select methods to control and prevent water pollution to meet effluent requirements within realistic constraints, such as economic, environmental and social aspects, health and safety.
7. Design and optimize various unit operations and unit processes used in water treatment and configure processes in a treatment plant. This includes obtaining and applying appropriate design values and making appropriate assumptions when needed

(Semester-II)
Paper- Physical Chemistry & Inorganic Chemistry (SCHECT1151)
(Theory)

Course Outcomes:

After studying mentioned topics students will able to know:

1. Intermolecular forces of interactions.
2. Distinguish between true solution, colloidal solution and suspension solution.
3. Applications of adsorption and colloids.
4. Define the acidic and basic radicals.
5. Uses of noble gases in diversified fields.
6. Explain the role of common ion effect, solubility product and complex formation during the separation metal ions.
7. Define the terms oxidation, reduction, oxidising agent and reducing agent.
8. Use the concept of oxidation number to identify oxidant and reductant in a reaction.
9. Balance chemical equations using (i) ion electron method (ii) oxidation number method.

Paper- Physical Chemistry & Inorganic Chemistry (SCHECP1151)
(Practical)

Course Outcomes:

After Performing experiments students will able to know:

1. Properties of water i.e. surface tension, viscosity, density etc.
2. To prepare solutions of desired concentrations.
3. Nature of aqueous solution of substance i.e. acidic, basic or natural.
4. The quantity of solute in solution using different titrimetric techniques.
5. The ideas to identify acidic or basic radicals qualitatively.

Generic Elective (GE) Paper Second (SCHEGE 1151)

Soil and Fertilizer Chemistry

Course Outcome:

After completion of syllabus students will be able to understand following outcomes.

- To define the concept of soil and fertilizer.
- To aware about the soil and effect of excessive fertilizers.
- To understand the importance of agriculture on global economy.
- To explain the seriousness of agro problems.

Semester II

Skill Enhancement Course

Common Laboratory Techniques

Course Outcomes:

1. Proficiency in Essential Laboratory Techniques: Students will demonstrate proficiency in refluxing, filtration, recrystallization, distillation, and boiling point determination, including the use of appropriate apparatus and adherence to safety precautions.
2. Enhanced Laboratory Safety Practices: Students will identify and mitigate fire, chemical, and gas hazards in the laboratory by applying safety protocols, proper handling and storage of hazardous materials, and appropriate emergency response measures.

3. Effective Use of Computer Technology in Laboratories: Students will effectively use computer hardware and software for laboratory applications, including data input, processing, and output, and utilize MS Office and Internet resources to support laboratory activities and data management.

4. Hands-On Laboratory Experience: Students will gain practical experience in preparing hydrogen sulfide gas, performing acid-base titrations, preparing distilled/deionized water, purifying organic compounds, preparing inorganic double salts, and conducting chromatography experiments, enhancing their laboratory skills and techniques.

OR

Skill Enhancement Course (SCHES 1151)

Soil Pollution

Course Outcomes

1. Apply knowledge of soil structure and soil formation to address soil environment issues.
2. Apply physical and chemical parameters of soil environment in the process of soil degradation and pollution assessment.
3. Evaluate the soil degradation, advantages and disadvantages of preventing and improving methods for soil pollution.
4. Assess the causes and sources of pollution to treat soil contamination.
5. Read English documents for describing soil degradation and pollution phenomena.
6. Practise the role and responsibility of an environmental engineer in soil environment toward the society.
7. Conceive ideas of soil environment improvement in soil degradation and pollution.

B. Sc. Second Year CBCS Pattern

Course No. :-CCC III (Section A)

Name of the Course:- Theory Paper-VI Organic + Inorganic Chemistry (P-VI)

Course Outcomes:

- Learn the mechanism of name reactions.
- Know the Synthesis, and Reactions of Aromatic Carboxylic and Sulphonic acids.
- Know the Synthesis, and Reactions of Organometallic compounds.
- Learn the synthesis, mechanism, applications of active methylene compounds.
- Gathering basic knowledge of Oils, Fats, Soaps and Detergents.
- Understand the basic principle and application of Qualitative Analysis.
- Know the Classification, Properties of Non- aqueous solvents.

Course No. :-CCC III (Section A)

Name of the Course :- Theory Paper-VII Physical + Inorganic Chemistry (P-VII)

Course Outcomes:

After completion of these courses students should be able to,

- Write an expression of Davisson-Germer experiment.
- Derive Schrodinger wave equation.
- Understand De-Broglie's hypothesis and uncertainty principle.
- Solve the numerical problems based on De-Broglie.
- Understand concept of entropy.
- Understand statements of first, second and third law of thermodynamics.

- Know the meaning of phase, component and degree of freedom.
- Know the nuclear structure & different energy of nuclear.
- Understand the different steps & procedure in the gravimetric separation method.

Course No. :-CCC III (Section A)

Name of the Course :- Theory Paper-VIII Organic + Inorganic Chemistry (P-VIII)

Course Outcomes:

- Learn the stereoisomerism of Chiral compounds.
- Know the Classification, and Reactions of carbohydrates.
- Know the Synthesis, and Reactions of Nitrogen Compounds.
- Gathering applications of Reagents in Organic Synthesis.
- Understand the Characteristics of d-Block Elements.
- Know the Characteristics of d-Block Elements.

Course No. :-CCC III (Section A)

Name of the Course :- Theory Paper-IX Physical + Inorganic Chemistry (P-IX)

Course Outcomes:

After completion of these courses students should be able to,

- Know the rate constant and factors affecting rate of reactions.
- Write an expression for rate constant (K) for first order, second order reaction.
- Know the terms cell constant, specific conductivity, equivalent conductivity and molar conductivity.
- Know the applications of Kohlrausch's law.
- Compare between thermal and photochemical reactions.
- Discuss different types of photochemical process.
- Know the preparation, properties, structure & application of different compounds.
- Discuss different inter halogen compounds by preparation, properties, structure and uses.

B. Sc. Third Year: Semester-V

Course No. :-(DSEC-V, Section A)

Name of the Course :- Theory Paper-XII Organic + Inorganic Chemistry (P-XII)

Course Outcome(s)

1. Learn the mechanism of electrophilic Substitution reaction of Heterocyclic Compounds.
2. Know the characteristics, Classification and synthesis of Drugs and Dyes.
3. Explaining theories of Colour and chemical constitution of Dyes.
4. Gathering basic knowledge of Alkaloids, Vitamins and Pesticides
5. Understand the basic principle and application of coordination complexes
6. Know the application of elements in Medicine

Course No. :-(DSEC-V, Section B)

Name of the Course :- Theory Paper-XIII Physical + Inorganic Chemistry (P-XIII)

Course Outcome(s)

1. Understand the concepts of molecular Spectroscopy and its applications
2. Analyze Rotational, Vibrational and Raman, Spectra
3. Interpret the theoretical and experimental methods of chemical kinetics
4. Know the theory and application of Distribution law

5. Explain the Nomenclature, classification and application of Organometallic Compounds
6. Illustrate the classification and application of Metal Carbonyls

Course No. :- (SEC III, DSECP-III) DSEC Vth & VIth (Section-A)

**Name of the Course :- Skill Enhancement Course- Computer Application in Chemistry
or
Applied analytical chemistry**

B. Sc. Third Year: Semester-VI

Course No. :- (DSEC-VI, Section A) (A1)

Name of the Course :- Theory Paper-XIV Organic + Inorganic Chemistry (P-XIV)

Course Outcome(s)

1. To learn the basic principle and terms used in UV, IR & NMR Spectroscopy
2. Acquire the fundamental knowledge of classification and Synthesis of Amino Acid and Peptides
3. Describe the types of Rearrangement
4. Postulates and limitations of VBT and CFT
5. Calculation of CFSE for Tetrahedral and Octahedral Complexes
6. Explain the types of electronic transition and selection rule
7. Apply spectroscopic techniques in analyzing the structure of simple organic Molecules

B. Sc. Third Year: Semester-VI

Course No. :- (DSEC-VI, Section B)

Name of the Course :- Theory Paper-XV Physical + Inorganic Chemistry (P-XV)

Course Outcome(s)

1. Basic concepts of electrochemistry and its applications
2. Understanding the Nernst heat theorem and the Thermodynamics open system
3. Know the Vant-Hoff's Reaction Osochore and numerical on it
4. Explain the types of magnetic substances and effect of temperature on it
5. Biological role of alkali and alkaline earth metal ions
6. Describe the structures and functions of Metal Cluster

Course No. :- (SEC IV, DSECP-IV) DSEC Vth & VIth (Section-B)

**Name of the Course :- Skill Enhancement Course- Spectroscopic Techniques and
Cosmetic Preparation**

OR

Basic analytical chemistry

Course Outcome(s)

1. Be able to determine the structure by using Spectra
2. To train the students for the preparation of various cosmetics

B.Sc. Botany

Learning Objectives :

The Objective of this program are :

1. To provide an updated education to the students at large in order to know the importance and scope of the discipline and to provide mobility to students from one university or state to other.
2. To update curriculum by introducing recent advances in the subject and enable the students to face NET, SET, UPSC and other competitive examinations successfully.
3. To impart knowledge of plant science as the basic objective of Education.
4. To develop a scientific attitude to make students open minded, critical and curious.
5. To develop an ability to work on their own and to make them fit for the society.
6. To expose themselves to the diversity amongst life forms.
7. To develop skill in practical work, experiments, equipments and laboratory use along with collection and interpretation of plant materials and data.
8. To make aware of natural resources and environment and the importance of conserving the same.
9. To develop ability for the application of the acquired knowledge in the fields of life so as to make our country self reliant and self sufficient.

B.Sc. S.Y. Botany

Major in BOTANY and Minor in DSM (Subject)

Under the Faculty of Science & Technology

(Revised as per the Govt. of Maharashtra circular Dt. 13th March 2024)

Program Outcomes:

The Outcomes of this program are:

PO1: This program will train and orient the students in the field of diversity of different life forms, Plant Anatomy, Plant Embryology, Plant Physiology, Plant Metabolism and Biochemistry.

PO2: This program will help the students for their career development.

PO3: This program will provide updated curriculum with recent advances in the subject and enable the students to face NET, SET, UPSC and other competitive examination successfully.

PO4: This program shall train and orient the students for laboratory skills and serve as human resource for the educational institutes, industries and other organizations.

PO5: The program also has a strong interdisciplinary component. Emphasis is given on the experimental learning through hands-on laboratory exercises, field trips and assignments.

PO6: Students will be able to understand and explain different specializations of Botany such as anatomy, Embryology, developmental biology, physiology, biochemistry etc. Students will be able to demonstrate the experimental techniques and methods in plant sciences and have innovative research ideas.

PO7: The program will enlighten the current thrust areas of the subject and provide substantial exposure and skills in plant biology.

PO8: Skill Enhancement Courses being offered during this program will provide job opportunities and additional specific skills to the students for self-employability through the development of their own enterprises.

Major in BOTANY and Minor in DSM (Subject)

Under the Faculty of Science & Technology

(Revised as per the Govt. of Maharashtra circular Dt. 13th March 2024)

PROGRAM SPECIFIC OUTCOMES (PSO) OF B.Sc. BOTANY:

By the end of the program the students will be able to:

PO1: Skill development for the proper description using botanical terms, identification, naming and classification of life forms especially plants and microbes.

PO2: Acquisition of knowledge on structure, life cycle and life processes that exist among plant and microbial diversity through certain model organism studies.

PO3: Understanding of various interactions that exist among plants and microbes; to develop the curiosity on the dynamicity of nature.

PO4: Understanding of the major elements of variation that exist in the living world through comparative morphological and anatomical study.

PO5: Ability to explain the diversity and evolution based on the empirical evidences in morphology, anatomy, embryology, physiology, biochemistry, molecular biology and life history.

PO6: Skill development for the collection, preservation and recording of information after observation and analysis- from simple illustration to molecular database development.

PO7: Making aware of the scientific and technological advancements- Information and Communication, Biotechnology and Molecular Biology for further learning and research in all branches of Botany..

PO8: Internalization of the concept of conservation and evolution through the channel of spirit of inquiry.

PO9: To enable the graduates to prepare for national as well as international level competitive examinations like UGC-CSIR, UPSC etc.

PO10: To enable the students for practicing the best teaching pedagogy as a biology teacher including the latest digital modules.

PO11: The graduates should be knowledgeable and competent enough to appropriately deliver on aspects of global importance like climate change, SDGs, green technologies etc at the right opportunity. **PO12:** The graduate should be able to demonstrate sufficient proficiency in the hands-on experimental techniques for their area of specialization within biology during research and in the professional career. **PO13:** The program enables the students to face NET, SET, MPSC, UPSC and other competitive examinations successfully.

**B. Sc. Botany, First Year Semester – I As Per National Education Policy- 2020**

To be Implemented from Academic Year 2024-2025

(Semester - I)**Major Core Theory Course****Course Code – SBOTCT 1101 Title of the Course: VIRUSES, BACTERIA AND ALGAE****Course outcomes:**

1. The students understand the morphology, structure, and evolution of various organisms like Viruses, Bacteria and Algae.
2. The students are able to differentiate between various groups of Viruses, Bacteria and Algae.
3. The students learn the importance of Viruses, Bacteria and Algae for human beings

Major Practical Course**Course Code – SBOTCP 1101 Title of the Course: Practical based on SBOTCT 1101****Course outcomes:**

1. Students develop skill and technique for handling microscope and different instruments in the Botany lab.
2. The students understand the morphology, structure, and interdependence of various organisms like Viruses, Bacteria and Algae.
3. The students learn the importance of Viruses, Bacteria and Algae for human beings.

Generic Elective Course**Course Code – SBOTGE 1101 Title of the Course: MEDICINAL PLANTS AND THEIR USES-I****Course outcomes:**

1. Understand history, Scope and Importance of Medicinal Plants & indigenous Medicinal Sciences
2. Describe the common medicinal plants in the neighborhood for therapeutical use.
3. Conserve endangered and endemic medicinal plants. 4. Efficient in modern tool use to get additional knowledge from the internet.

Skill Enhancement Course**Course Code – SBOTSC1101 Title of the Course: TRICHODERMA CULTIVATION TECHNIQUE****Course outcomes:**

1. Understanding the role of organic farming.
2. Understanding the potential of Trichoderma as an alternative to chemical fertilizers
3. Role of Trichoderma in protecting the environment and managing the waste.

Semester – II**Course Code – SBOTCT 1151 Title of the Course: FUNGI, LICHENS AND MYCORRHIZA****Course outcomes:**

1. The students understand the morphology, structure, and interdependence of various organisms like Fungi, Lichens and Mycorrhiza.
2. The students are able to differentiate between various groups of Fungi, Lichens and Mycoplasma.
3. The students learn the importance of Fungi, Lichens and Mycoplasma for human beings

Major Practical Course

Course Code – SBOTCP 1151 Title of the Course: Practical based on SBOTCT 1151

Course outcomes:

1. Students develop skill and technique for handling microscope and different instruments in the Botany lab.
2. The students understand the morphology, structure, and interdependence of various organisms like Viruses, Bacteria, Algae, Fungi, Lichens and Mycoplasma.
3. The students learn the importance of Fungi, Lichens and Mycoplasma for human beings.

Generic Elective Course

Course Code – SBOTGE 1151 Title of the Course: MEDICINAL PLANTS AND THEIR USES-II

Course outcomes:

1. Understand history, Scope and Importance of Medicinal Plants & indigenous Medicinal Sciences
2. Describe the common medicinal plants in the neighborhood for therapeutical use.
3. Conserve endangered and endemic medicinal plants. 4. Efficient in modern tool use to get additional knowledge from the internet.

Skill Enhancement Course

Course Code – SBOTSC 1151 Title of the Course: MUSHROOM CULTIVATION TECHNIQUE

Course outcomes:

1. Students understand mushroom cultivation technique
2. Students understand the potential of mushroom cultivation as a source of food.
3. Students understand the potential of mushroom cultivation as a source of self-employment.

B.Sc. S.Y. Semester –III

CCB-III (A)

Theory Paper –VI : Plant Anatomy(Compulsory)

Course Outcomes:

1. The students will be able to understand the meristem (RAM & SAM) different simple and complex tissues and secondary growth in root and stem.
2. Students will acquire knowledge of anatomy of root, stem and leaf in dicot and monocot plants.

Semester –IIICCB-III (B)

Theory Paper –VII : Plant Physiology & Biochemistry(Compulsory)

Course outcomes:

1. Students understand mushroom cultivation technique
2. Students understand the potential of mushroom cultivation as a source of food.
3. Students understand the potential of mushroom cultivation as a source of self-employment.

B.Sc. S.Y. Semester –IV

CCB-IV (A)Theory Paper –VIII : Plant Embryology(Compulsory)

Course Outcomes:

1. This course will be able to demonstrate foundational knowledge in embryology of plants.
2. Students will be able to understand the development of pollen, Ovule, and fertilization and palynological information.

B.Sc. S.Y. Semester –IV

CCB-IV (B)Theory Paper –VIII : Plant Metabolism & Biotechnology(Compulsory)

Learning Outcomes:

1. Students will be able to understand the various metabolic processes such as photosynthesis, respiration, Nitrogen metabolism etc. which are important for life.
2. Students shall be become familiar with the gene cloning and its transfer in plants
3. Students shall learn different databases and their applications

PROGRAM OUTCOMES (POs):

PO1: This program will train and orient the students in the field of Cell Biology, Molecular Biology, Plant Breeding, Plant Pathology, Systematic Botany, Herbal Technology and Other fields of Botany.

PO2: This will provide updated curriculum with recent advances in the subject and enable the students to face NET, SET, UPSC and other competitive examinations successfully.

PO3: Students shall be able to identify different plant species, plant diseases and shall be able to do their management.

PO4: This program shall train and orient the students so as to develop human resource for the educational institutes, industries and other organizations.

PO5: This will also develop specific skills amongst students for self employability through the development of their own enterprises.

PO6: This shall develop ability in the students for the application of the acquired knowledge in the fields of life so as to make our country self-reliant and self-sufficient.

**B.Sc. T.Y. Botany
Semester – VDSEB-I**

Theory Paper –XII :Cell & Molecular Biology (Compulsory)

Learning Outcomes:

1. The students will be able to understand ultra structure of a cell, cell wall, cell membrane, cell organelles and chromosomes, cell cycle and cell division.
2. The students will be able to understand in detail the structure of DNA and RNA, protein synthesis, gene structure, gene mutation and related diseases.
3. Students will acquire knowledge of cell and molecular biology

B.Sc. T.Y. Botany Semester – VDSEB-I

Theory Paper –XIII :Plant Pathology(Compulsory)

Learning Outcomes:

1. The students will be able to understand fundamentals of plant pathology.
2. The students will be able to understand in detail the process of plant disease development.
3. Students will acquire knowledge of different plant diseases in different plants.

B.Sc. T.Y. Botany Semester – VIDSEB-I

Theory Paper –XIII :Genetics & Plant Breeding(Compulsory)

Learning Outcomes: Students shall

1. Understand Mendelian genetics, gene interaction.
2. Learn the sex determination, linkage, sex linked inheritance and genetic variations.
3. Understand various crop improvement methods in plant breeding.

B.Sc. T.Y. Botany Semester – VIDSEB-I

Theory Paper –XV :Plant Pathology-II(Compulsory)

Learning Outcomes:

1. The students will be able to understand fundamentals of aerobiology and seed pathology.
2. The students will be able to understand in detail the process of plant Defense mechanism and management.
3. Students will acquire knowledge of different plant diseases in different plants.

DSEZ-I; Section-A:

PAPER-XII- ECOLOGY AND ZOOGEOGRAPHY:

- _ To understand and appreciate the interactions of organisms with their environments and the consequences of these interactions for population, community, and ecosystem dynamics.
- _ To be aware of the current environmental issues with an understanding of the basic ecological concepts involved.
- _ To study the local and geographical distribution and abundance of organisms (habitat niche, community, bio-geography).
- _ To understand the inter-relationship between individuals in population and communities

(population ecology).

- _ To study the structural adaptations and functional adjustment of organisms to their physical environment.
- _ To study the conservation and management of natural resources and pollution (applied ecology).

DSEZ-I; Section-B: PAPER-XIII (C)- ENTOMOLOGY- I

- _ To define general entomology and classifying insects according to their economic importance.
- _ To acquaint students with the morphology and anatomy of selected insect species.
- _ To introduce students to insect biology.
- _ To impart knowledge of insect ecology covering factors like effect of light, temperature, humidity.

DSEZ-II; Section-A: PAPER-XIV- ETHOLOGY, BIOMETRY AND BIOINFORMATICS

- _ To study the behavior of organism under natural conditions (Ethology).
- _ To understand the concepts of Biometry.
- _ To get acquainted with and apply the fundamentals of applied statistical methodology.
- _ To give students an introduction to the basic practical techniques of bioinformatics.
- _ To emphasize the application of bioinformatics and biological databases for problem solving in real-life & research.
- _ To familiarize student with the use of a wide variety of internet applications, biological database and to enable them to apply these methods under various situations.

DSEZ-II; Section-B: PAPER-XV(C)- ENTOMOLOGY- II:

- _ To introduce students to the ecology and biology of insects of medical and agricultural importance.
- _ To provide students with opportunities to understand insect pest management techniques such as cultural, physical, Biological, chemical, IPM etc.
- _ To provide students an adequate knowledge of various types of insecticides and problems associated with their use.
- _ To equip students knowledge of practical applications of insecticides and maintenance of pesticide equipment.

ZOOLOGY
Major in DSC and Minor in DSM (Subject)
With effect from June 2024
Academic Year 2024 – 2025 (As per NEP-2020)

Program Outcomes:

- To provide students with a strong foundation in the basic science, scientific and fundamentals necessary to formulate, solve and analyze problems and to prepare them for undergraduate studies.
- To prepare students to demonstrate an ability to identify, formulate and solve basic science problems.
- To prepare students to demonstrate ability to design systems and conduct experiments, analyze and interpret data.
- To prepare students to demonstrate for successful career in industry to meet needs Four Year UG Credit Framework of Sci. & Tech. Faculty of S.R.T.M.U. Nanded Page 5 of 48 of Indian and multi-national companies. To develop the ability among students to synthesize data and technical concepts.
- To provide opportunity for students to work as part of teams on multidisciplinary projects.
- To promote awareness among students for the life-long learning and to introduce them to professional ethics and codes of professional practice.

Course Outcomes of the Program

B. Sc. First Year
Zoology (W.e.f. June -2024)
Semester-I

SZOOCT1101 : Biodiversity of Non-chordates

Course outcomes:

1. The student will be able to identify a given non-chordates up to class level.
2. Ability to understand the contribution of non-chordates in the biodiversity index of any given habitat.
3. Ability to understand and appreciate the ecological and economic importance of non-chordates.
4. Ability to identify and describe external morphology and internal anatomical features of representative non-chordates species.

SZOOCP1101 : Biodiversity of Non-Chordates (Based on Paper No. SZOOCT1101)

Course Outcomes:

1. Ability to understand the anatomical organization of organs and systems in representative species.
2. Ability to identify and describe structure and functions of different body parts of non-chordates.

3. Students would be able to prepare temporary and permanent mountings of biological material.
4. Students would make observations of organisms in their natural environment and document them.

Generic Elective (GE/OE)

SZOUGE1101: Animal Diversity - I

Course Outcomes : Upon completion of the course, students will be able to:

1. Distinguish between major phyla of animals through a demonstrated understanding of their taxonomic classification and diversity.
2. Describe the distinguishing characteristics of all major phyla.
3. Understand the fundamental differences among animal body plans and relate them to function, taxonomic classification, and evolutionary relationships among phyla.
4. Illustrate lifecycles, structure, function and reasons for importance of few representative organisms from different groups of animals.
5. Identify anatomical structures from prepared tissues.
6. Observe living animals in the environment and relate observations to theory from the course.
7. Recognize major animal phyla and animals on the basis of their external characteristics.

Skill Enhancement Course in Zoology

SZOOSC1101: (A) Parasites of Public Health Importance

Course Outcomes:

1. Due to this, the study of these parasites is of paramount significance, to which this skill set attempts to address.
2. Knowledge and understanding of biology of parasites of public health importance.
3. Recognize and appreciate the medical importance of common arthropods and diseases caused by them.
4. Flawlessly perform collection, processing, identification and reporting of parasites of public health importance.

Skill Enhancement Course in Zoology

SZOOSC1101: (B) Vermiculture & Vermicomposting

Course Outcomes:

1. Knowledge of morphology and biology of earthworms used in vermiculture.
2. Ability and skill of rearing earthworms and using them in vermicomposting.
3. Proper operating of implements and equipment used in vermicomposting.

Semester-II

SZOOCT1151 : Biodiversity of Chordates

Course outcomes:

1. The student will be able to identify and understand the Biodiversity of Chordates.
2. Ability to understand anatomical relation between different vertebrate classes.
3. The learner will be able to understand the economic importance of Chordates.

**SZOOC1151 : Biodiversity of Chordates (Based on Paper No. SZOOC1151)****Course Outcomes:**

1. Ability to understand the anatomical organization of organs and systems in representative species.
2. Ability to identify and describe structure and functions of different body parts of vertebrates.
3. Students would be able to prepare temporary and permanent mountings of biological material.
4. Students would be able to relate different bones and be able to articulate them to form an skeleton.
- 5 Students would make observations of organisms in their natural environment and document them.

Generic Elective (GE/OE)**SZOOGE1151: Animal Diversity - II****Course Outcomes**

Upon completion of the course, students will be able to:

1. Distinguish between major phyla of animals through a demonstrated understanding of their taxonomic classification and diversity.
2. Describe the distinguishing characteristics of all major phyla.
3. Understand the fundamental differences among animal body plans and relate them to function, taxonomic classification, and evolutionary relationships among phyla.
4. Illustrate lifecycles, structure, function and reasons for importance of few representative organisms from different groups of animals.
5. Identify anatomical structures from prepared tissues.
6. Observe living animals in the environment and relate observations to theory from the course.
7. Recognize major animal phyla and animals on the basis of their external characteristics

Skill Enhancement Course in Zoology**SZOOSC1151: (C) Aquarium Keeping****Course Outcomes:**

1. Describe different types of aquariums and raw material used to fabricate them.
2. Ability to properly handle material and accessories for aquarium fabrication and installation.
3. Identify water parameters and adjust them to normal conditions.

Skill Enhancement Course in Zoology**SZOOSC1151: (D) Animal Museology****Course Outcomes:**

1. After completion of the course the students self-sufficient in the preservation techniques of biological specimens, which would be an asset for safeguarding artifacts derived from animal and plants act as to provide great opportunity for self-employment.
2. Learners are expected to be able to handle museum objects, identify the factors and causes of deterioration and be able to take proper preservative measures.
3. Job opportunity as a curator.

B.Sc. Second Year (Semester III & Semester IV) Syllabus w.e.f. June, 2020

Choice Based Credit System (CBCS) Course Structure

Semester Pattern Syllabus

Semester- III

Paper: CCZ- III: Physiology and Biochemistry

Section- A Title of Paper: Paper- VI: Physiology

Outcome of the Course:

On successful completion of the course, the students will be able to

1. Monitor their blood pressure and identify blood groups.
2. Understand function and types of heart & circulatory system.
3. Appreciate the basic function of kidney, main function of nerves.
4. Acquire knowledge on the nature and functions of hormones and learn the mechanism of hormone action.
5. Learn the structure and functions of Endocrine glands.
6. Understand the structure, development and function of reproductive organs in human.

Paper: CCZP- II Section- A & B

Title of Paper: Practical Paper X: Physiology and Biochemistry

(Practical based on P-VI & VII)

Course Outcomes:

1. Students able to improve the skills in microscopy, slide preparation, observations, drawings and laboratory techniques.
2. To acquaint the students with operations of the different laboratory equipment.
3. Ability to understand the detection of blood groups of humans.
4. Ability to Understand the estimation of blood cell counts, Haemoglobin content in humans.
5. To acquaint the students with operation of clinical procedures for blood & urine analysis.

Semester- IV

Paper: CCZ-IV: Cell Biology, Genetics, Evolutionary Biology and Genetic Engineering

Section- A Title of Paper: Paper- VIII: Cell Biology and Genetics

Outcome of the Course:

On successful completion of the course, the students will be able to

1. Understand the structure and function of the cell as the fundamentals for understanding the functioning of all living organisms.
2. Understand structures and various cellular functions associated with the macromolecules found in cells.
3. Acquire knowledge of Mendelian Genetics and its Extension.
4. Graduates will be able to explain and interpret various processes, phenomena, states and evolutionary tendencies at a biological system level.

Paper: CCZ- IV: Cell Biology, Genetics, Evolutionary Biology and Genetic Engineering
Section- B Title of Paper: Paper- IX: Evolutionary Biology and Genetic Engineering

Outcome of the Course:

On successful completion of the course, the students will be able to

1. Understand the theories and concepts of evolution.
2. Learn the process of evolution in animals.
3. Understand the patterns of evolutionary changes in animals.
4. Understand the organization and functions of genetic material in the living world.
5. Understand the Recombinant DNA Technology.

Paper: CCZP- III Section –A & B

Title of Paper: Practical Paper XI: Cell Biology, Genetics, Evolutionary Biology and Genetic Engineering (Practical based on P-VIII & IX)

Course Outcomes:

1. Students would be able to prepare temporary squash preparations of onion root tips for mitosis.
2. Demonstrate the genetic traits in Man.
3. Ability to culture Drosophila flies in the laboratory.
4. Ability for mounting of salivary glands of Drosophila larvae.
5. Students are able to understand the outline of Genetic Engineering.
6. Ability to Learn the role of Genetic Engineering in biology.

Skill Enhancement Course (SEC)

SECZ –I (A): HAEMATOLOGY

Course Outcomes

1. Ability to explain composition and functions of blood.
2. Knowledge about compounds used in processing and storage of blood.
3. Skill to be able to use different techniques used in study of blood cells.
4. Ability to collect, preserve and analyze blood samples.
5. Knowledge of changes in blood composition in disease.

SECZ –I (B): URINOLOGY

Course Outcomes

1. Ability to describe function of human urinary system.
2. Skill to collect, preserve, process and store urine samples.
3. Skill to perform physical, chemical and microscopic examination of urine samples.
4. Ability to document findings of urine examination/analysis.

SECZ –II (C): HISTO-TECHNOLOGY

Course Outcomes

1. Ability to identify different types of tissues and distinguish between different components of cells.

2. Skill related to fixation of tissue samples and microtechnic processing of tissues.
3. Ability to identify, handle and catalogue slides of different tissues.
4. Students' skill in operating and maintaining different types of microtomes.

SECZ- II (D): APICULTURE

Course Outcomes

1. Ability to understand and describe the life stages and social organization of honey bee species.
2. Ability to correctly explain and perform bee rearing, farming and harvesting practices.
3. Appreciate the economic importance of derivative benefits and byproducts of apiculture.
4. To identify and take remedial measures against the different bee diseases and predators.

B.Sc. Third Year

Zoology

Choice Based Credit System (CBCS-R2021) Course Structure

Effective from June, 2021

B.Sc. Third Year Syllabus w.e.f. June, 2021

Semester -V

Paper: DSEZ-I; Section –A Title of Paper: Paper-XII -Ecology & Zoo-geography

Course Outcomes:

1. Demonstrate knowledge of biotic and abiotic interactions.
2. Express understanding of environmental issues, and inter-relation between different components of an ecosystems.
3. Ability to elaborate about distribution and abundance of organisms.
4. Apply different experimental techniques to study any ecosystem or its components.
5. Describe the relation between structure and function species in environment.
6. Display knowledge of natural resources and pollution management techniques.

Paper: DSEZ-I; Section –B Title of Paper: Paper-XIIIA -Pisciculture

Course Outcomes:

1. Ability and skill to design and construct a fish farm.
2. Skill to describe and undertake different methods of fish breeding.
3. Describe different food fish species and their capture methods used in India.
4. Elaborate about different fishing craft and gear used in Indian capture fishery.
5. Knowledge of fish diseases and skill to treat sick fish with appropriate techniques.

Paper: DSEZ-I; Section –B Title of Paper: Paper-XIIIB -Applied Parasitology-I (Parasitic Protozoa and Platyhelminthes)

Course Outcomes:

1. Demonstrate understanding of basics Applied parasitology; host-parasite relationships and life cycle of parasites.

2. An understanding of epidemiology, disease transmission and control & treatment of parasitic diseases caused by protozoans and platyhelminthes.
3. An ability to identify and describe common protozoan and helminth parasites.
4. Knowledge of locally occurring human parasites and national parasitic diseases.
5. An understanding of economic cost of animal and human parasitic diseases.

**Paper: DSEZ-I; Section -B Title of Paper: Paper- XIII (C)-
Entomology-I (General Entomology)**

Course Outcomes:

1. Knowledge of the structure and function of earth's ecosystem.
2. An understanding of different types of ecosystems and biodiversity
3. An ability to classify biodiversity and identify threats to biodiversity.
4. An understanding of human influence on biodiversity.
5. Knowledge of modern tools and technique for study and conservation of ecosystem and wildlife.

Semester -VI

**Paper: DSEZ-II; Section -A Title of Paper:
Paper- XIV-Ethology, Biometry and Bioinformatics**

Course Outcomes:

1. An appreciation of animal behavior and complexities of ethology.
2. Knowledge of basic concepts and techniques of biometry.
3. Knowledge and skill to apply the techniques statistical methods in biology.
4. Knowledge and understanding of practical use of computers in bioinformatics.
5. An understanding of the use of biological databases in research.

Paper: DSEZ-II; Section -B Title of Paper: Paper- XV(A)-Aquaculture

Course Outcomes:

1. Knowledge and understanding of aquaculture methods, mariculture, and fish processing.
2. An understanding of the different man-made hazards to aquaculture.
3. Knowledge and skill to use different species of locally available larvivorous fish in vector control.
4. Knowledge and understanding of the role of Government agencies in development of aquaculture.

Paper: DSEZ-II; Section -B

**Title of Paper: Paper- XV (B) Applied Parasitology-II
(Parasitic Nematodes and Arthropods)**

Course Outcomes:

1. An understanding of Parasitology of Nematodes and Arthropods.
2. Knowledge of morphology, biology, taxonomy & pathogenicity of nematodes in plants and animals.

3. Knowledge and skill to implement control measures against nematode parasites.
4. Understanding and knowledge of arthropods of public health importance.
5. Knowledge of vector-host-pathogen relationships in arthropod transmitted diseases.
6. An understanding of the different surveillance techniques and diagnosis methods used in control of and management of vector-borne diseases.

Paper: DSEZ-II; Section -B Title of Paper:

Paper- XV (C)-Entomology-II (Applied Entomology)

Course Outcomes:

1. An understanding and knowledge of ecology & biology of medically and agriculturally important insects.
2. Knowledge of the different beneficial and harmful insects.
3. An understanding of insect control methods- cultural, physical, biological, chemical & IPM.
4. Knowledge of types of insecticides and problems associated with their use.
5. Knowledge and skill of application of insecticides & maintaining pest control equipment.

Paper: DSEZ-II; Section -B Title of Paper: Paper- XV (D)-Environmental Biology -II

Course Outcomes:

1. Ability to assimilate causes of pollution, and its effects on environment.
2. Awareness about environmental issues and problems at local, national and international level.
3. An understanding of the laws and agencies pertaining to protection of environment.
4. Knowledge about environment, pollution and related problems.

Practical

Paper: DSEZP-I (Based on DSEZ-I; Section-A& DSEZ-II; Section-A)

Title of Paper: Paper- XVI

-Ecology, Zoo-geography, Ethology, Biometry and Bioinformatics

Course Outcomes:

1. Skill of handling, testing and analysis of water samples.
2. Recognition and description of animal adaptations under different ecological and zoo-geographic conditions.
3. Describe animal responses to different environmental signals.
4. Apply different techniques to gather analyze analyze data using a computer.
5. Browse, search and download information from online biological databases.

Paper: DSEZP-II (Based on DSEZ-I; Section-B& DSEZ-II; Section-B)

Title of Paper: Pisciculture and Aquaculture {XVII (A)}

Course Outcomes:

1. Perform fish farm practices, farm management, fish breeding & rearing.
2. Adopt appropriate fish preservation and processing techniques for fish by-products.

3. Ability to identify and describe fish of capture and culture food fish.

Paper: DSEZP-II (Based on DSEZ-I; Section-B& DSEZ-II; Section-B)

Title of Paper: Applied Parasitology {XVII (B)}

Course Outcomes:

1. Demonstrate knowledge and skill of identifying, classifying and describing different protozoan, helminth, nematode and arthropod parasites.
2. Perform preservation and mounting of protozoan, helminth, nematode and arthropod parasites.
3. Carry out collection and processing of soil and plant parasitic nematodes.

Paper: DSEZP-II (Based on DSEZ-I; Section-B& DSEZ-II; Section-B)

Title of Paper: Entomology {XVII (C)}

Course Outcomes:

1. Demonstrate awareness of, and skill to identify, classify and describe anatomical parts, organ systems and morphology of insects.
2. Explain the different methods of collection, preservation and curating of insects specimens.
3. Ability to handle equipment and other tools used in chemical and biological control of insect pests.

Paper: DSEZP-II (Based on DSEZ-I; Section-B& DSEZ-II; Section-B)

Title of the Paper: Environmental Biology {XVII (D)}

Course Outcomes:

1. Ability to measure different environmental parameters of water, air and soil.
2. Skill of identification of plant and animal biodiversity of an ecosystem.
3. Perform quantification of pollutants in abiotic and biotic components of an ecosystem.

Major Mathematics (DSC)

Under the Faculty of Science and Technology

Effective from Academic year 2024 – 2025 (As per NEP-2020)

B.Sc. (Mathematics)

Program Outcomes (POs):

PO1 Disciplinary Knowledge: B.A/ B.Sc in Mathematics is the zenith of in-depth knowledge of Algebra, Analysis, Geometry, Calculus and several other branches of mathematics. This also leads to study interdisciplinary areas such as computer science and other allied subjects.

PO2 Communication Skills: Ability to communicate various mathematical concepts effectively using examples and their geometrical visualization. Skill and Knowledge attained during program will increase the ability to solve real world problems.

PO3 Digital Proficiency: The completion of this program will enable the learner to use appropriate software's to solve mathematical problems

PO4 Ability to work Independently: The Learner completing this program will grow the capacity to do work independently.

PO5 Critical Thinking and Logical Reasoning: Student will acquire ability of critical thinking and logical reasoning.

PO6 Mathematical Principles: students will understand mathematical principles and their applications.

PO7 Confidence of Learning: The B.Sc. Program will develop learners mathematical knowledge and oral, written, and practical skills in a way which will encourage confidence, satisfaction and learning enjoyment.

PO8 Ability to peruse advanced studies and research: Students will be motivated high for doing higher education and research in Academically strong institution

PO9 Skill/Vocational Courses: Students will have to study skill/Vocational courses related to pure and applied Mathematics.

PO10 Generic /Open Elective : As an interdisciplinary approach student will study GE/OE course in Mathematics

Mathematics Curriculum

B.A. / B.Sc. I

SEMESTER-I

DSC-1 Topics in Algebra

Course Outcomes:

CO1: Students can Sort one-one, onto functions and can compute equivalence relation.

CO2: Students Can apply Law of Induction and Euclidean Algorithms

CO3: Student can compute REF, RREF and rank of any ordered matrix

CO4: Student can solve Linear System of Equation and apply Caley Hamilton Theorem

DSC-2: Lab Course -I (Calculus Using SAGE)

Course Outcomes:

After successful completion of the course student will be able to

CO1: Do basic programming in Sage

CO2: Do practical's on Calculus

CO3: Know Programming and Data Structures

CO4: Plot 2D, 3D Curve and display solution of differential equation.

GE/OE: Foundation of Mathematics

Course Outcomes:

After Successful completion of this course students can able to

CO1: Compute distance formula, midpoint formula, equation of lines ,parallel lines and perpendicular lines

CO2: Find symmetry of graphs

CO3: Discuss limit and continuity of given function'

CO4: Apply derivatives to compute maxima and minima

Skill Enhancement Course

SEC- Basics of MATLAB/Scilab

Course Outcomes:

After successful completion of the course student will be able to

CO1: Perform basic MATLAB/Scilab commands and will apply MATLAB/Scilab for elementary number theory problem.

CO2: Do Arithmetic Operations of Arrays

CO3: Solve elementary linear Algebra examples using MATLAB/Scilab

CO4: Compute Row Reduced Echelon Form

(SEMESTER-II)

DSC-4: Analytical Geometry

Course Outcomes:

CO1: After successful completion of this course students can able to Study and analyse Geometry of two dimensions.

CO2: Learners can compute angle between two planes and lines

CO3: Learners can compute tangent to given Sphere

CO4: Student can study various forms of Sphere

DSC-5: Lab Course-II(Integral Calculus)

Course Outcomes:

After Successful completion of this course students can

CO1: Discuss integral as limit of sum and apply fundamental theorems of Integral Calculus.

CO2: Study Beta and Gamma Functions.

CO3: Do multiple integrations.

CO4: Study application of Multiple integral.

GE/OE : Basic Algebra

Course Outcomes:

After Successful completion of this course students can

CO1: Understand matrices and determinants.

CO2: Solve system of linear equations.

CO3: Calculate rate of interest .

CO4: Solve LPP and apply it in real life problems.

SEC-

Programming Using MATLAB/Scilab

Course Outcomes:

After successful completion of this course students are able to:

CO1: Do programming using MATLAB

CO2: Define function and function files

CO3: Plot two dimensional graphs

CO4: Plot three dimensional plots.

B.A./B.Sc. (Mathematics)

CHOICE BASED CREDIT SYSTEM (CBCS) SEMESTER PATTERN

Semester III

CCM-3, Section-A Paper VI: Real Analysis-I

Course Outcomes: After successful completion of the course student will be able to

1. Understanding the basic concept of sets and their properties.
2. Understanding the concept of a neighborhood of a point, interior points of a set, open set.
3. Understanding concept of limit points of a set, closed set, closure of a set, dense set.
4. Understanding the basic concept of sequences, subsequences, bounds of sequences, limit point of sequences, general principle of convergence, different types of sequences.
5. Understanding the concept of infinite series, different types of series, the general principle of convergence
6. Use the results to solve some problems.
7. Understanding the difference between different types of sequences, series, and comparison tests.

CCM-3, Section B Paper VII: Group Theory

Course Outcomes: After successful completion of the course student will be able to

1. Understand the concepts on an equivalence relation.
2. Find the examples of equivalence relation.
3. Check whether the given set, is a group for the given operation or not.
4. Understand the general properties of groups.
5. Solve problems on groups.
6. Understand the concepts of the cyclic group.
7. Use Lagrange's theorem to solve the problems in number theory.
8. Form a quotient group.
9. Find the kernel of a group homomorphism.

CCM-3, Section-C Paper VIII: Ordinary Differential Equations

Course Outcomes: After successful completion of the course student will be able to

1. Understanding concept of solution of differential equations, order and degree.
2. Transform the equations into variable separable form.
3. Transform first-order non-homogeneous equation in x and y to homogeneous equation in x and y and solve it.
4. Find the equations that can be resolved into components equation and solve it.
5. Solve Clairaut's equation.
6. Find the solutions when the auxiliary equations are equal, different, repeated, and imaginary roots.
7. Find the solution of the exact differential equation, rules of finding the integrating factor.

8. Transform non-linear equation to linear equation and solve it.
9. Find integral corresponding to a term of the form e^{ax} , x^m , $\sin ax$ or $\cos ax$, $e^{ax}V$, x^mV , x^2V in the second member.
10. Find the solution of linear equation with variable coefficients.
11. Transform the equations to the homogeneous linear form.
12. Transform the homogeneous linear equation with constant coefficient by changing the independent variable x to z by putting $x = e^z$ or $Z = \log x$

Semester-IV

CCM-4 Section-A Paper IX: Real Analysis-II

Course Outcomes: After successful completion of the course student will be able to

1. Understand the meaning of interval, subinterval, partitions, and their refinement.
2. Understanding the basic concept of upper integral and lower integral and Riemann integral.
3. Understanding difference between upper sum, lower sum and Riemann sum
4. Acquire the idea about Riemann Integrability and Riemann Integration
5. Understand various theorems associated with Riemann Integration
6. Develop a knowledge about Riemann Integration and applies to problems
7. Understand the meaning of improper integral.
8. Determine convergence of improper integrals with discontinuities in their domain or infinite limits of integration.
9. Develop skill in checking the convergence of improper integral using various tests of convergence
10. Understanding distinguishes between convergence and absolute convergence of improper integral.
11. Use comparison test with a corresponding improper integral with other improper integral to decide whether improper integral converge or diverge
12. Use the results to solve some problems.

CCM-4, Section-B Paper X: Ring Theory

Course Outcomes: After successful completion of the course student will be able to

1. Understand given algebraic structure is a Ring or not.
2. Construct the examples of ring with known examples of ring.
3. Differentiate between zero-divisors and non-zero-divisors in a given ring.
4. Check whether given two rings are isomorphic or not.
5. Check whether the given ideal of a ring is a principal ideal or not.
6. Understand the concepts on principal ideal ring
7. Understand concepts on Euclidean rings.

CCM-4, Section-C Paper XI: Partial Differential Equations

Course Outcomes: After successful completion of the course student will be able to

1. Classification of PDE.

2. Solve linear as well as non-linear PDE of first and second order.
3. Apply PDE techniques to predict the behavior of certain phenomena.
4. Solve real problems by identifying them approximately from the perspective of PDE.
5. Mathematical formation of real problem precisely.
6. Solve problem using boundary conditions.

B.A./B.Sc. (Third Year) (Mathematics)

CHOICE BASED CREDIT SYSTEM (CBCS) SEMESTER PATTERN

Semester-V

DSEM-5, Section-A Paper XII: Metric Spaces

Course Outcomes: After successful completion of the course student will be able to

1. Demonstrate an understanding of metric spaces and subspaces by proving unseen results.
2. Produce examples and counterexamples illustrating the mathematical concepts.
3. Understand the concepts of open and closed sets.
4. Understand the concepts and develop skill to check the positions of a point in the space.
5. Understand the concepts of convergences and completeness.
6. Understand the concepts of fixed point and Banach principle.
7. Understand the concepts of continuity and uniform continuity.
8. Understand the concepts of compact and non-compact sets with various properties.
9. Understand the concepts of Lebesgue Number for Covers and connectedness of sets.
10. After completion of this course student can aware with basic concepts of functional analysis.

DSEM-5, Section-B Paper XIII: Linear Algebra

Course Outcomes: After successful completion of the course student will be able to

1. Understand and prove algebraic statements about vector spaces, subspaces, basis, Inner product spaces.
2. Determine a basis and the dimension of finite dimensional space.
3. Understand and prove statements about linear transformations.
4. Find the kernel, range, rank and nullity of linear transformation.
5. Determine Eigen values and Eigen vectors.
6. Interpret a matrix as a representation of linear transformation.

DSEM-5, Section-C Paper XIV (A): Operation Research

Course Outcomes: After successful completion of the course student will be able to

1. Formulate a given simplified description of a suitable real-world problem as a linear programming.
2. Sketch a graphical representation of a two-dimensional linear programming problem.
3. Solve a two-dimensional linear programming problem graphically
4. Use the simplex method to solve simple linear programming models by hand.
5. Understanding transportation problem and solve simple assignment problems.

DSEM-5, Section-C Paper XIV (B): Mechanics-I (Statics)

Course Outcomes: After successful completion of the course student will be able to

1. Understand concepts of motion, force and its importance in Physical Sciences.
2. After learned this course , Student will be interested in Applied Mathematics.
3. Develop research oriented skills in Applied Mathematics
4. Know the principles of equilibrium of two forces.
5. To realize the forces acting on a particle , forces acting on a rigid body and its derivations.
6. Analyze the equilibrium state of a particle and rigid body.
7. Obtain the equivalent force - couple system of a given system.

DSEM-5, Section-C Paper XIV(C): Numerical Analysis

Course Outcomes: After successful completion of the course student will be able to

1. Estimate the value of a function under certain assumptions.
2. Find the missing terms in the given data using numerical techniques.
3. Apply numerical derivation and numerical integration methods.
4. Investigate numerical solutions of differential equations.
5. Find the integration of a functions using numerical methods.
6. Find the solutions of ordinary differential equations.

Semester-VI

DSEM-6, Section-A Paper-XV: Complex Analysis

Course Outcomes: After successful completion of the course student will be able to

1. Operate basic mathematical operations with complex numbers in Cartesian and polar forms.
2. Demonstrate the ability of limit, continuity, analyticity of a function.
3. Find the derivative and integral of a complex variable function.
4. Work with exponential and logarithmic functions.
5. Use Cauchy integral theorem and Liouville's theorem.
6. Use Taylor and Laurent's series.

DSEM-6, Section-B Paper XVI: Integral Transforms

Course Outcomes: After successful completion of the course student will be able to

1. Understand the concept of Integral Transforms
2. Identify integral transforms by their integration limits and kernels
3. Obtain integral transforms of functions
4. Know the formulae for integral transforms of standard functions
5. Understand various properties of integral transforms
6. Apply the integral transforms for evaluating integrals
7. Apply the integral transforms along with their inversion formulae for solving differential equations with initial conditions

8. Apply the integral transforms along with their inversion formulae for solving systems of simultaneous differential equations with initial conditions

DSEM-6, Section-C Paper XVII(A): Topology

Course Outcomes: After successful completion of the course student will be able to

1. Understand Concept of Topological spaces.
2. Understand Topological Properties of Sets.
3. Understand the concept of order Topology and product topology.
4. Understand concept of Subspace topology.
5. Understand Concept of Closed and Open sets, limit points.
6. Understand of continuity, Concept of Homeomorphisms, Imbedding's.
7. Understand the separation properties like Hausdroff Spaces and T1 Axioms.
8. Understand basic Concept of Connected Spaces and compact Spaces.
9. Understand Utility of Connected and compactness.

DSEM-6, Section-C Paper XVII (B): Mechanics-II (Dynamics)

Course Outcomes: After successful completion of the course student will be able to

1. Understand Newton's Laws of Motion and its importance in Physical Sciences.
2. Develop research oriented skills in Applied Mathematics.
3. Understand the expressions for Velocity and Acceleration, Components of Velocity and Acceleration and principles of equilibrium of two forces.
4. To realize the forces acting on a particle , forces acting on a rigid body and its derivations.
5. Analyze the Impulsive Force and its Impulse, Conservation of Linear Momentum and , Impact of two bodies.
6. Find the Motion of Projectile and Derivation of Equation of its trajectory, Cartesian Equation of the path of Projectile, equivalent force - couple system of a given system.

DSEM-6, Section-C Paper XVII(C):Elementary Number Theory

Course Outcomes: After successful completion of the course student will be able to

1. Apply different methods of proofs including induction, contradiction, counter examples to verify mathematical assertions.
2. Explain basic concepts like divisibility, greatest common divisor, congruences, linear congruences.
3. Solve systems of Diophantine equations using the Euclidean algorithm and Chinese remainder theorem
4. Demonstrate knowledge and understanding of prime numbers.
5. Use Fermat's theorem and Wilson's theorem.

Major in PHY (Physics) and Minor in DSM (Subject)
UNDERGRADUATE PROGRAMME OF SCIENCE & TECHNOLOGY
(Revised as per the Govt. of Maharashtra circular Dt.13th March 2024)
Semester I

**SPHYCT1101: Fundamentals of Physics I****Course Outcomes:**

- Students will be able to understand the fundamental nature of Physics.
- Students will be enabled to handle different types of problems and other advanced courses in Physics and Chemistry.

SPHYCP1101: Practical- I (based on Fundamentals of Physics I)**Course outcomes:**

- ✓ Students will be able to understand different concepts and principles of Physical instrumentations.
- ✓ Student will learn about validity of concepts by doing the experiment.

SPHYSC1101 (Skill): Computational Physics**Course outcomes:**

- ✓ This course being pre requisite for many advance courses hence students will be able to learn hand on experiments, program designing.
- ✓ Students will be made aware with computer systems and its functioning.

SPHYGE1101 (Generic Elective): Renewable Energy**Course outcome:**

- ✓ After completing this course the students will gain knowledge of various non-conventional energy sources.
- ✓ Students will be able to understand use of renewable energy sources in day to life.
- ✓ Hand on experiments will provide them an expertise to resolve the basic issues of functioning of renewable energy source.
- ✓ Students will be trained to harvest non-conventional energy sources and design their own gadgets to convert and use them for their house hold purposes.

Semester II**SPHYCT1151: Fundamentals of Physics II****Course Outcomes:**

- Students will be able to understand the fundamental nature of Physics.
- Students will be enabled to handle different types of problems and other advanced courses in Physics.

SPHYCP1151: Practical-II (based on Fundamentals of Physics II)**Course outcomes:**

- ✓ Students will be able to understand different concepts and principles of Physical instrumentations.
- ✓ Student will learn about validity of concepts by doing the experiment.

SPHYSC1151 (Skill): Electrical Measurements**Course outcome:**

- After completing this course the students will gain knowledge of various electrical gadget installations at domestic levels. .
- Students will be able to understand wiring systems and electrical connections of different phases at house hold appliances.
- Hand on experiments will provide them an expertise for electrical installations, maintenance and wiring repairs.

SPHYGE1151 (Elective): Wonders in the Sky

Course outcome:

- ✓ Identify the objects visible to the unaided eye in the night sky
- ✓ Explain the phenomenon like seasons on earth, solar and lunar eclipse
- ✓ Explain the dynamics of planet in solar system, use the orbital properties to estimate mass of the sun
- ✓ Compare and contrast the terrestrial planets and the Jovian planets
- ✓ Derive the scientific understanding and explain the observed properties of stars and estimate their temperature, mass, size etc
- ✓ Describe the scale of universe and relative sizes of the different objects within the Universe
- ✓ Describe the Earth's place in the solar system, Galaxy and Universe

Major in Microbiology and Minor in DSM (Subject)

UNDERGRADUATE PROGRAMME OF SCIENCE & TECHNOLOGY

(As per NEP-2020)

(Revised as per the Govt. Of Maharashtra circular Dt. 13th March 2024)

Effective from the Academic year 2024-2025

PROGRAMME OBJECTIVES:

- To enrich students with knowledge and understanding of the different disciplines of Microbiology such as medical Microbiology, immunology, biochemistry, fermentation technology, environmental Microbiology, genetics, agricultural and food Microbiology, Waste management.
- To make students learn advanced fields of microbiology such as Nanobiotechnology and Marine microbiology.
- To introduce the concepts of application and research in Microbiology and inculcate sense of scientific responsibilities.
- To help student's build-up a progressive and successful career in Microbiology.
- To take a step ahead for the holistic development of students through activities like lectures from eminent personalities, Visits, and various competitions.
- It makes the students competent enough to use Microbiology knowledge and skills to analyze problems involving microbes and undertake remedial measures.

- In addition, students are to be trained to use this knowledge in day-to-day applications and get a glimpse of research.
- The students graduating in B.Sc. Microbiology degree must have thorough understanding the fundamentals of Microbiology as applicable to wide ranging contexts.
- They should have the appropriate skills of Microbiology so as to perform their duties as microbiologists.
- They must be able to analyze the problems related to Microbiology and come up with most suitable solutions.
- As Microbiology is an interdisciplinary subject the students might have to take inputs from other areas of expertise. So, the students must develop the spirit of team work.

PROGRAM SPECIFIC OBJECTIVES [PSOB]: Programme Specific

Objectives for B.Sc. Microbiology are as follows:

- **PSOB-1.** The broad goal of the teaching to under graduate students in Microbiology is to provide knowledge and skills in Microbiology to develop practical skills through the laboratory work, their presentation and articulation skills, exposure to industry and interaction with industry experts, write short research - based projects.
- **PSOB-2.** To learn basic concepts of amazing world of Microorganisms, Techniques in Microbiology, basics of Bacteriology, Cultivation, and growth of Micro-organisms.
- **PSOB-3.** To understand concepts of Medical Microbiology, Epidemiology, Immunology, Bacterial Physiology, Fermentation Technology, Bacterial Genetics, Air, Water and Soil Microbiology.
- **PSOB-4.** To strengthen the fundamentals of various fields of Microbiology.
- **PSOB-5.** To develop scientific aptitude and motivate students to take up higher studies like B. Sc. (Hons. / Hons. with Research) microbiology and Research.
- **PSOB-6.** To realize and appreciate the applicability of knowledge and Interdisciplinary approach in everyday life.
- **PSOB-7.** The graduate students of microbiology should have basic skills such as culturing microbes, maintaining microbes, safety issues related to handling of microbes, Good Microbiological practices etc.

PROGRAMME SPECIFIC OUTCOMES [PSOC]: Programme specific outcomes for B.Sc. Microbiology are as follows:

- **PSOC-1.** The student will be able to explain various fields of Applied Science including Medicine, Pharmacy, Cell biology, Biotechnology, Industrial Production, Biochemistry, Nanotechnology, Environmental Management, Food, Dairy, Immunology, Agriculture and Bioinformatics
- **PSOC-2.** The students will be able to design and execute experiments related to Basic Microbiology, Immunology, Molecular Biology, Recombinant DNA Technology, and Microbial Genetics, etc.

- **PSOC-3.** The students will be able to execute a short research project incorporating techniques of Basic and Advanced Microbiology under supervision.
- **PSOC-4.** The students will be able to acquire sound knowledge of classification, taxonomy, structure, types of microorganisms and various fields of microbiology.
- **PSOC-5.** The students will be able to do experiment in microbiology laboratory to identify the microorganisms in various samples including clinical, environmental, water and food samples.
- **PSOC-6.** The students will be able to acquire knowledge about various diseases thereby can create awareness to the public.
- **PSOC-7.** The students will be able to provide knowledge on food processing, and fermented food products.
- **PSOC-8.** The students will be able to utilize various agricultural waste, marine sources as raw material for production of various fermented products to reduce accumulation of waste in the environment.
- **PSOC-9.** The students will be able to check the quality of water, dairy and food products by various learnt microbiological techniques
- **PSOC-10.** The students will be able to provide knowledge about history of Microbiology and contribution of various scientists. branches of Microbiology, basic structure of organism in details, microbial nutrition requirement for organism and microbial growth, microbiological techniques and control, different type of staining techniques used to distinguish between different type of bacteria and its organelles.
- **PSOC-11.** The students will be able to acquire knowledge about the different types of bacteria and viruses, microbial interaction, prevention of food from spoilage, preservation of food from food borne disease and food standards. also study the testing and preservation of milk and milk product in dairy industries.
- **PSOC-12.** The students will be able to acquire knowledge about the basic structure like Nucleic acid, carbohydrates metabolism, amino acids, enzymology in details and various vitamins. also study the fermentation at industrial level and upstream and downstream processing of fermentation
- **PSOC-13.** The students will be able to acquire knowledge about different types of metabolic pathways and its regulation related to carbohydrates amino acid. also study about different type of waste water treatment methods and water testing methods. this also cover air and agriculture microbiology with bioremediation and biomagnification.
- **PSOC -14.** The students will be able to acquire knowledge about the epidemiology and host parasites, disease transmitted and their various sources, control and prevention & spreading of infection, learn about normal flora present in body, study of pathogenic and non-pathogenic

organism, morphology, cultural and biochemicals characteristic, pathogenesis, serology test and lab diagnosis, gene mutation and regulation of gene.

➤ **PSOC-15.** The students will be able to acquire knowledge about Immunity, various defense mechanism, organs of immune system, adaptive immunity, and cell mediated immune response. tools and techniques of genetic engineering. also come to know about health care, agriculture, and industrial biotechnology.

➤ **PSOC-16** The students will be able to Explain why microorganisms are ubiquitous in nature; inhabiting a multitude of habitats and occupying a wide range of ecological habitats, their role in these ecological niches, influence of microbiome on our health, environmental cleanup, variety of industrial product development, and their significance in human wellbeing.

➤ **PSOC-17.** The students will be competent enough to use microbiology knowledge and skills to analyze problems involving microbes, learning use of microbes as a model organisms to understand facts about living systems, analyze the genetic makeup of different types understand of microbes, articulate these with peers/ team members/ other stake holders through effective communication, and undertake remedial measures/ studies etc.

➤ **PSOC-18.** The students will take up a suitable position in academia or industry and to pursue a career in research.

➤ **PSOC-19.** The students will be able to develop their skills to start small scale business in various microbiological laboratories and in the field of research and health.

(Semester – I)

Core Theory Course: Microbiology Course Name: Basic Microbiology

Course Code :SMICCT1101

Course outcomes:

- Students have the acquaintance of concept of microbiology and its scope in different fields.
- Students comprehend the historical developments in microbiology field.
- Students get acquainted with microscopes used in Microbiology Laboratory.
- Students have the expertise in the staining techniques,
- Students get acquainted with ultrastructure of bacteria.

Course Name: Practicals based on Course SMICCT1101

Course Code :SMICCP1101

Course outcomes:

- Students have acquainted the skill and technique for handling microscope.
- Students developed the skill and technique for staining the bacteria and their structural components.

Generic Elective Course: Microbiology Course Name: Fundamentals of Hygiene

Course Code :SMICGE1101

Course outcomes:

Students should be able to,

- Practice own personal, community and public hygiene
- Evaluate food safety and incorporate in daily life.
- Implement Public Hygiene standards with the help of digital media.
- Implement good hygiene practices regularly in society.

Skill Enhancement Course: Microbiology

Course Name: Fundamental Microbiology Laboratory Techniques

Course Code :SMICSC1101

Course outcomes:

- Students have the skill to handle different instruments used in microbiology laboratory.
- Students comprehend the skill for preparation of different types of culture media used for cultivation of bacteria.
- Students get acquainted with skill for isolation of bacteria by using different techniques.

Core Theory Course: Microbiology Course Name: Microbial Physiology

Course Code :SMICCT1151

Course outcomes:

- Students have the acquaintance about the sterilization techniques.
- Students have the expertise in the microbial cultivation techniques,
- Students get acquainted with microbial growth, reproduction, and sporulation.

Core Practical Course: Microbiology

Course Name: Practicals based on Course SMICCT1151

Course Code :SMICCP1151

Course outcomes:

- Students have acquainted the skill and technique for handling different instruments in Microbiology Laboratory.
- Students developed skill and technique for preparation of media and isolation of bacteria by different methods from different sources.
- Students developed the skill and technique for studying the effect of environmental factors on the growth of bacteria.

(Semester – II)

Generic Elective Course: Microbiology

Course Name: Microorganisms for Human Welfare

Course Code :SMICGE1151

Course outcomes:

- Students get acquainted with fermented food prepared from Wheat.
- Students get acquainted with fermented food prepared Milk and Vegetables.
- Students get acquainted with fermented food prepared from Legumes and Oil Seeds.
- Students get acquainted with fermented food prepared from Grape.

**Skill Enhancement Course: Microbiology****Course Name: Physiological and Biochemical Laboratory Techniques****Course Code :SMICSC1151****Course outcomes:**

- Students have the skill of determining the motility of the bacteria.
- Students comprehend the skill for testing the effect of environmental factor on environmental factor on bacterial pigment formation.
- Students get acquainted with skill and technique for biochemical analysis of Bacteria.
- Students get acquainted with skill for the microscopic measurement of Cyanobacteria, Bacteria, and yeast.

B. Sc. Second Year**Faculty of Science and Technology****Subject: Microbiology****Semester Pattern effective from June – 2020****Semester – III****Paper Name: Applied Microbiology (P-VI) CCMB III (Section A)****Paper Number: VI****Course Outcome:**

Applied microbiology trains students for gaining expertise in the microbial world and the way it interacts with humans. It looks at how we can harness and utilize the powers of the microbes in areas ranging from air, water and sewage microbiology to Milk Microbiology and extends to industrial applications. A wide range of microbial by-product production, quality assessment and health hazard monitoring is possible by students who get well versed in this course.

Paper Name: Immunology (P-VII) CCMB III (Section B)**Paper Number: VII****Course Outcome:**

Understand the basic components of the immune system and how this system serves to protect the host against disease-causing microbes. Understand Concept related to cells and organs related to immune system, Immunity, Immune response and immune mechanism of both Immunity & Hypersensitivity.

(Semester – IV)**Paper Name: Food, Soil Microbiology and Microbial Ecology (P-VIII) CCMB IV****(Section A) Paper Number: VIII****Course Outcome:**

To apply the knowledge of microorganisms causing food spoilage, pathogens that may cause disease post cooked or storage, those used to produce fermented foods such as cheese, yogurt, bread, beer, and wine, meat and meat products, fruits vegetables and those with other useful roles

such as producing probiotics. Understand of principles of soil science, microbiology, and the chemistry and physics of natural elemental cycles, which maintain the balance of our ecosystem. Describe significance of soil fertility, appreciate role of soil microorganisms which play essential roles in the nutrient cycles that are fundamental to life on the planet. Illustrate and explain how microbes are responsible for cycling nutrients through the environment, creating important symbiotic relationships, providing energy in the absence of sunlight, and digesting the food we eat.

Paper Name: Medical microbiology (PIX) CCMB IV (Section B)

Paper Number: IX

Course Outcome:

Impart Knowledge of the diverse places where microbiology is involved. Understanding of diverse Microbiological processes. Basic skills such as culturing microbes, maintaining microbes, safety issues related to handling of microbes, Good Microbiological practices etc. Moderately advanced skills in working with microbes such as Pathogens.

Paper Name: Annual Practical's based CCMBP II [CCMB III & IV (Section A)]

Paper Number: Practical's based on P-VI & P-VIII (P-X)

Course Outcome:

Acquire skills of handling microorganisms in the laboratory and study their characteristics. Has developed laboratory skills in isolating and detecting microbes from soil and water. Laboratory skills of testing microbial load in Food and milk. Has developed skills for growing microorganisms in the laboratory to produce different enzymes

1. Bacteriological examination of air by Solid Impingement Techniques.
2. Bacteriological examination of water: Quantitative analysis: MPN method
3. Bacteriological examination of water: Qualitative analysis: Presumptive, Confirmatory, Completed test,
4. Differentiation between fecal and non-fecal coliforms by IMViC test
5. Elevated temperature test (Ejeckman test).
6. Determination of R: S ratio.
7. Demonstration of Ammonification
8. Demonstration of Nitrification
9. Demonstration of Phosphate solubilization
10. Isolation and study of Rhizobium species from root nodules of leguminous plants.
11. Isolation and study of Azotobacter sp. from soil
12. Bacteriological analysis of milk: MBRT
13. Bacteriological examination of food by SPC method
14. Bacteriological examination of food by DMC method
15. Alkaline phosphatase test to check pasteurization of milk

Paper Name: Annual Practical's based CCMBP III [CCMB III & IV (Section B)]

**Paper Number: Practical's based on P-VII & P-IX (P-XI)****Course Outcome:**

Acquire skills of handling microorganisms in the laboratory and study their characteristics. Has developed laboratory skills in detecting enzymes antigen and antibodies using diagnostic kits Laboratory skills of staining blood and enumerate RBCs and WBCs in whole blood. Has developed skills for growing Pathogenic microorganisms in the laboratory and identifying them on basis of various biochemical tests and perform antibiotic sensitivity tests.

1. Blood staining by Leishman's / Giemasa's method
2. Metachromatic granule staining (Albert's Method)
3. Acid fast staining
4. RBC counting
5. WBC counting
6. Blood grouping
7. Widal test: Qualitative and Quantitative by slide method
8. RPR test
9. Gel diffusion test (Demonstration)
10. Isolation and Study of Morphology, Cultural and Biochemical characteristics of the Salmonella sp.
11. Isolation and Study of Morphology, Cultural and Biochemical characteristics of the Vibrio cholerae
12. Isolation and Study of Morphology, Cultural and Biochemical characteristics of the Staphylococci
13. Study of bacterial flora of skin by swab methods
14. Antibiotic sensitivity tests for above pathogens by disc diffusion method
15. Coagulase test

Paper Name: Public Health Microbiology SECMB - I (Section A)**Paper Number: SECMB - I****Course Outcome:**

Have developed a very good understanding of practical aspects diagnosis of common human waterborne infections, preventive measures for human waterborne infections by the use of antibiotics and vaccines, Gain skills food and milk quality testing.

Paper Name: Microbial Biofertilizers SECMB - I (Section B)**Paper Number: SECMB - I****Course Outcome:**

Have developed a very good understanding of practical aspects production of biofertilizers.

Paper Name: Diagnostic Microbiology SECMB - II (Section A)**Paper Number: SECMB - II****Course Outcome:**

Have developed a very good understanding of practical aspects of collection of different clinical samples, their transport, culture and examination by staining, and molecular and immunological diagnostic methods for diagnosis of microbial diseases.

Paper Name: Medical Laboratory Techniques SECMB - II (Section B)

Paper Number: SECMB - II

Course Outcome:

Have developed a very good understanding of practical aspects of collection of different clinical samples, their transport, culture and examination by staining, and molecular and immunological diagnostic methods for diagnosis of microbial diseases.

B. Sc. Third Year

Subject: Microbiology

CBCS Semester Pattern effective from June -2021

Semester- V

Specific Program Outcome:

The aim of the undergraduate degree in Microbiology is to make students knowledgeable about the various basic concepts in wide-ranging contexts, which involve the use of knowledge and skills of Microbiology and acquire knowledge and understanding of the microbiology concepts as applicable to diverse areas such as medical, industrial, environment, genetics, agriculture, food and others. Their understanding, knowledge and skills in Microbiology needs to be developed through a thorough teaching learning processes in the class, practical skills through the laboratory work, their presentation and articulation skills, exposure to industry and interaction with industry experts, write short research-based projects where they are guided and mentored by the academic and other experts of the subject. The student should have developed competency to demonstrate key practical skills in working with microbes for study and use in laboratory as well as outside, including the use of good microbiological practices and also developed broad perspective of the discipline of Microbiology to enable him to identify challenging society problems and plan his professional carrier to develop innovative solutions for such problems.

Specific Course Outcome:

Microbial Genetics course makes students to understand the evidence given to prove DNA and RNA as genetic material, properties of DNA as genetic material, and structure of prokaryotic chromosome. They also comprehend knowledge of the DNA replication process in prokaryotes, genetic recombination, and genetic material transfer among the microorganisms through transformation, conjugation and transduction.

Paper Name: Microbial Metabolism DSEMBI (Section B I)

Paper Number: XIII A

Course Outcome:

Microbial Metabolism course makes students to get the knowledge of enzymes, physicochemical properties of enzymes, nomenclature and classification of enzymes, mechanism of action of enzyme and factors affecting the enzyme activity. Students become capable of differentiating the catabolic and anabolic process and also defining the role of different pathways in generating the ATP, different fermentation products such as ethanol, lactic acid etc.

Paper Name: Nitrogen Metabolism DSEMBI (Section B II)

Paper Number: XIII B

Course Outcome:

Nitrogen Metabolism course makes students understand

- The role of nitrogen fixers in environmental Nitrogen Cycle,
- Microbiology and biochemistry of oxidation of Ammonia. Nitrite and Denitrification.
- Biosynthesis of purine, pyrimidine, and catabolism of nucleotides
- Different pathway to synthesis the amino acids

Semester: VI

Paper Name: Molecular Biology DSEMBII (Section A)

Paper Number: XIV

Course Outcome:

Molecular Biology course makes students understand

- Characteristics of genetic code, structure of RNAP and ribosome, and gene expression in term of transcription and translation process
- The concept of mutation, types of mutation and repair of DNA
- Gene regulation at transcriptional and translational level, the Lac Operon and Trp Operon of E. coli
- Tools and the methods for genetic engineering

Paper Name: Industrial Microbiology DSEMBII (Section B I)

Paper Number: XV A

Course Outcome:

By Industrial Microbiology course the students

- Are capable of describing a large number of substrates that are used for the industrial fermentation processes
- Have developed an understanding of different types of reactors or fermenters which are used for laboratory, pilot and industrial scale fermentations and their processes parameters.
- Has acquired a fairly good knowledge of how microbes are used in the fermentative production of organic acids, alcohols, enzymes, antibiotics and various foods in the industry
- Has acquired knowledge of various physical parameters which affect production of industrial products by the microorganisms and the safety aspects of the production and use of these products.

Paper Name: Pharmaceutical Microbiology DSEMBII (Section B II)

**Paper Number: XV B****Course Outcome:**

By Pharmaceutical Microbiology course the students

- Acquired detailed knowledge of antimicrobial agents, their chemical nature, and mechanism of action and basis of resistance of microbes to these antimicrobials, formulations involving different antimicrobials, stabilization of formulations
- Developed understanding of different types of disinfectants/antiseptics and their specific uses, and evaluation of their bactericidal and bacteriostatic actions, basic knowledge of cell cultures.
- Developed practical skills for testing pharmaceutical products for sterility testing and pyrogenicity testing using different methods

**Paper Name: Practicals Based on P – XII & P – XIV
(DSEMBP I [DSEMB I & II Section A])****Paper Number: XVI****Course Outcome:**

By this annual practical course, the students

- Acquired the practical skill for extraction, purification, and study of DNA Profile.
- Developed understanding and skill for studying the effect of different mutagens on growth of *E. coli*
- Acquired the practical skill for extraction and purification of RNA from *S. cerevisiae*
- Developed understanding and skill for studying genetic material transfer by conjugation and transduction
- Developed practical skills for determination of MIC and LD50 of Streptomycin

**Paper Name: Practicals Based on P – XIII A & B & P – XVA & B
(DSEMBP II [DSEMB I & II Section B I & II])****Paper Number: XVII****Course Outcome:**

By the end of this annual practical course, the students

- Have acquired the skill for primary screening of antibiotic producer, amylase producer and organic acid producer.
 - Have acquired a detailed knowledge and skill of number of products which are produced by industrial fermentation processes, like citric acid, penicillin, wine etc.
 - Have acquired the knowledge to study the enzymes, production of enzymes
1. Estimation of reducing sugar by Sumner's method.
 2. Estimation of Amino acids by Rosen's method
 3. Study of enzymes (Lecithinase, Gelatinase, Urease, Caseinase, Catalase)
 4. Fermentative production of Production of amylase
 5. Effect of various physicochemical parameters on amylase activity (pH, Temp)
 6. Primary screening of antibiotic producers, amylase producers, organic acid producers

7. Production of Penicillin (Surface / submerged)
8. Fermentative production of Wine & and its estimation by Titrable acidity
9. Production of Citric acid (Surface / submerged) & its estimation by Titrable acidity
10. Production of Biofertilizer (Azotobacter)
11. Bioassay of Penicillin
12. Bioassay of therapeutic enzyme glucose oxidase
13. Determination of antimicrobial activity of chemical compound (Phenol)
14. Sterility testing by using Bacillus stearothermophilus / Bacillus subtilis

Semester: V

Paper Name: Enzyme Technology (SECMBIII A)

Paper Number: Skill - III

Course Outcome:

By the end of this skill course, the students

- Have developed a particularly good understanding of sources of enzymes and their applications in various fields.
- Have developed skill for isolation, Purification, and Immobilization of enzymes.
- To understand the importance of enzymes in day today life.

Paper Name: Molecular Biology Techniques (SECMB III B)

Paper Number: Skill - III

Course Outcome:

By the end of this skill course, the students

- Have acquired good understanding of enzymes involved in genetic engineering, hybridization techniques, cloning vector, cloning methodologies.
- Have acquired the skill required for handling procedures of genetic engineering.

Semester: VI

Paper Name: Bioprocess Technology (SECMB IV A)

Paper Number: Skill - IV

Course Outcome:

By the end of this skill course, the students

- Have acquired good understanding of bioprocesses involved in manufacture of agro based products
- Have acquired skill for production of food and dairy products.
- Have acquired good knowledge of industrial waste treatment.

Paper Name: Good Manufacturing Practices (GMP) (SECMB IVB)

Paper Number: Skill - IV

Course Outcome: By the end of this skill course, the students

- Have acquired good understanding of GMP and GLP.
- Have acquired practical skill to carry sterilization of Pharmaceutical Products.

ENVIRONMENTAL STUDIES (R-2023)
UNDER NATIONAL EDUCATION POLICY (NEP 2020)
COMMON FOR ALL FACULTIES ALL GRADUATE PROGRAMS

VECES 151: Environmental Studies

Course Outcomes:

1. Develop the ability to communicate environmental information and ideas logically and concisely in a variety of forms.
2. Provide an understanding of interactions between people and the environment.
3. Increase an awareness of the importance of living in harmony with the environment.
4. Recognize and evaluate the socio-economic, political and ethical issues in Environmental Science.
5. Foster positive attitudes, values and commitment in identifying, solving and preventing environmental problems.
6. Develop an understanding of how natural resources and the environment affect quality of life and the quest for sustainable development.

Course Code: IKS -I INTRODUCTION TO INDIAN KNOWLEDGE SYSTEM

Effective from Academic year 2024 – 2025 (As per NEP-2020)

Semester I

Course Outcomes:

1. Explain fundamental principles and concepts of Indian knowledge systems.
2. Analyze contributions to humanities, recognizing cultural and artistic significance.
3. Assess impact of Indian achievements in STEM fields on global knowledge systems

BACHELOR OF ALL

Value Education Course on Constitution of India

Under the Faculty of ALL Effective from Academic Year 2024-2025

(As per NEP -2020)

Program Objectives of Constitution of India:

- ✓ To develop the understanding of constitutional fundamental rights and duties, sovereignty and socialism.
- ✓ To aware the students about values of justice, equality, liberty, brotherhood and endeavor to promote fraternity among them.
- ✓ To realize the significance of constitution of India to students from all walks of life and help them to understand the basic concepts of Indian constitution.
- ✓ To understand the functioning of Union, State and Local Governments in Indian federal system.
- ✓ To understand the framework defining fundamental political principles, establishing the structure, procedures, powers and duties of government institutions and sets out fundamental rights, directive principles and the duties of citizens.

Program Learning Outcomes of Constitution of India:

At the end of the successful completion of the course, the students will be able to

- ✓ Understand the key aspects and concept of the Indian Constitution.
- ✓ Comprehend the structure and philosophy of the Constitution.
- ✓ Realize the significance of the constitution and appreciate the role of constitution and citizen oriented measures in a democracy.
- ✓ Understand the Fundamental Rights and Duties of the Indian Citizen to instill morality, social values, honesty, dignity of life and their Social Responsibilities.
- ✓ Apply the knowledge on directive principle of state policy.
- ✓ Analyze the History, features, and principles of Indian constitution.

In addition to above more program educational objectives of their own may be added by affiliated Institute. In addition to Program Educational Objectives, for each course of undergraduate program, objectives and expected outcomes from learner's point of view are also included in the curriculum to support the philosophy of outcome based education. I believe strongly that small step taken in right direction will definitely help in providing quality education to the stake holders.

Paper Code : VECCOI1151 Title- Constitution of India (VEC)

Course Outcomes:

At the end of the successful completion of the course, the students will be able to

- Know the sources, features and principles of Indian Constitution
- Understand historical background of the constitution making and its importance for building a democratic India
- Understand the value of the fundamental rights and duties for becoming good citizen of India
- Understand the structure of executive, legislature and judiciary
- Understand philosophy of fundamental rights and duties of Indian Citizens.
- Understand the making process of Indian Constitution.
